

R_ExpectCovarInfluence

```
graph LR; A[R_ExpectCovarInfluence] --> B[C_ExpectCovarInfluence]; A --> C[ncol]; A --> D[nrow];
```

A diagram illustrating the relationship between R_ExpectCovarInfluence and three other variables. R_ExpectCovarInfluence is shown in a black box on the left. Three arrows originate from its right side: one points diagonally up to C_ExpectCovarInfluence (a white box at the top right), one points horizontally to ncol (a white box in the middle right), and one points diagonally down to nrow (a white box at the bottom right).
