

Firmware 3.34A04

Infortrend[®]

New Release and Update Information

Firmware Core: 3.34A04

Compatible RAIDWatch version: 2.0

Software release is temporarily not available at Infortrend's FTP site.

1. Overview

New features:

1. Scheduled Media Scan

Revision 3.34 allows Media Scan to be scheduled starting at a specified start time and repeated at regularly timed intervals. The start time and time intervals can be selected from drop-down menus. Start time is manually entered using its numeric representatives in the following order [MMDDhhmm[YYYY]], and it reads the date and time set for the controller's real-time clock.

The selectable time intervals (the Execution Period) range from one (1) second to seven (7) weeks.

Each such schedule can be defined to operate on individual hard drives, all members of a specified logical drive, or members of selected logical drives. Each schedule can include up to five (5) logical drives. The RS-232C terminal and RAIDWatch revision 2.0 will support this functionality.

2. Perpetual Calendar

Implemented display of a perpetual calendar with user interface.

3. RAIDWatch Support

Support for RAIDWatch revision 2.0.

2. Applicable Products

Firmware 3.34A04 is applicable to the following subsystem:

Models	Corresponding Binary
EonStor U12U-G3A3	FA334A04_16_IFT_ESU12UG3A3.zip
EonStor U16U-G3A3-4	FA334A04_18_IFT_ESU16UG3A34.zip
EonStor U16U-G3A3-6	FA334A04_15_IFT_ESU16UG3A36.zip

3. List of Problems Fixed

None.
