ZyXEL B-6020 Standard Version release 3.50(HY.1)C0 Release Note

Date: January 25, 2005

Supported Platforms:

ZyXEL B-6020

Versions:

ZyNOS Version: V3.50(HY.1)C0 | 1/17/2005 16:21:22

Bootbase Version: V1.1 | 1/17/2005 16:25:10

Notes:

Known Issues:

1. Issues in PQA's report are not fixed at this released version.
2. When two FTP clients run ftpget/ftpget concurrently, they could not finish the ftpget task, but ftpget task will be finished normally.
3. Many MIB objects' values are not correct, such as "ifNumber.0", "ifInUcastPkts.1" and "ifOutUcastPkts.1".
4. When running smart application test and IPSec activated, the throughput with packet length 1518 is less than packet length 1280.
5. During the ping test, BU or RU will not respond to ICMP request when packet length is greater than 1472.
6. In SMT 24-10, can't assign domain name to "Time Server Address" field.

Features:

Modifications in V3.50(HY.1)C0 | 01/17/2005

1. Release FCS version 3.50(HY.1)C0
