Benefits

High Speed

ZyXEL's all-new wireless client adapters are compatible with IEEE802.11g standard, delivering a top speed of 54Mbps — five times faster than the current IEEE802.11b wireless network standard. With the ZyXEL 54Mbps wireless client adapters designed for laptops or desktops, you can enjoy Internet resources, access e-mails; and deliver large files, MP3 or videos with easy and safe high-speed wireless connection.

Maximum Freedom of Mobility

ZyXEL's client adapters provide you with the freedom of accessing the Internet anywhere, offering the maximum freedom of roaming while you are at home, in the office, or on hot spots such as airports, cafés, or hotels. With the compatibility with both 802.11b and 802.11g standard, the ZyXEL client adapters can interact with these networks wirelessly without limitation of physical ties.

Enhanced Wireless Security

In addition to the basic 64/128-bit WEP encryption, the ZyXEL wireless network adapters featured the latest, enhanced wireless security mechanisms of 802.1x authentication and Wi-Fi Protected Access (WPA) as well. These enhanced security measures allow only authorized users to access the network and thus further protect your data from being tapped during the wireless transmission.

Easy Installation and Operation

With the friendly setup Wizard, installation is quick and simple. The Plug-and-Play feature allows you to access a network wirelessly in virtually no time.

Features

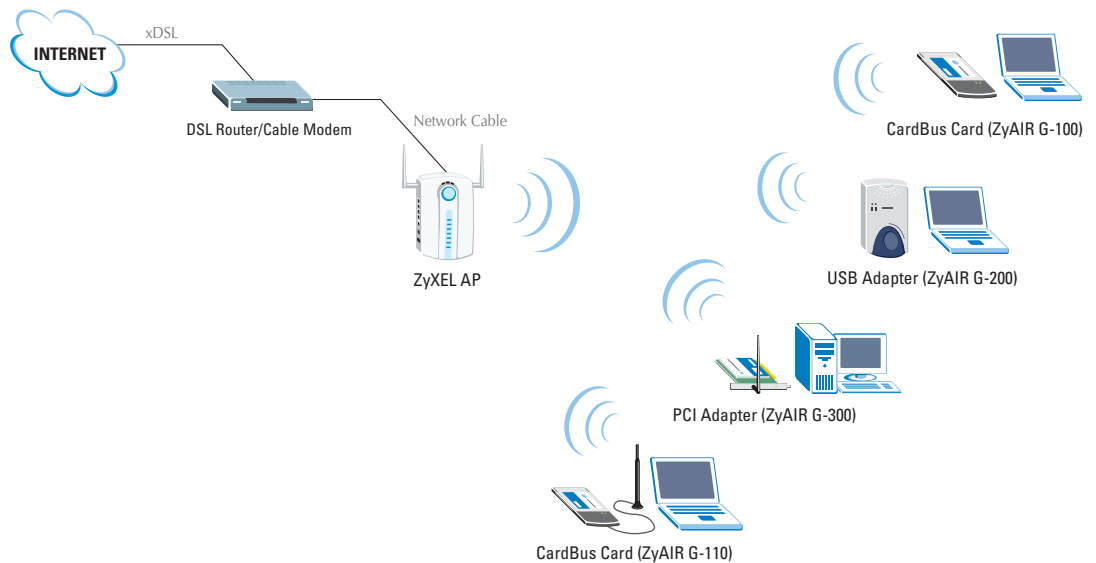

- Data rate of up to 54Mbps, five times faster than 802.11b; good for delivering large files, MP3 and video media
- Works with both IEEE 802.11b and 802.11g (both at 2.4 GHz), and offers the freedom of mobility
- 64/128-bit WEP Encryption and WPA support ensure wireless data security
- Wi-Fi Certificate to ensure interoperability
- WHQL Certificate to ensure compatibility with Microsoft Windows
- Optional connector (AMX converting to R-SMA) for external-range extender antenna (ZyAIR G-110)
