I saw in the cheats section that you can modify your high score through the registry in which the game saves that high scores at. I how no clue as to how to get there. I have Windows XP. Can someone possible teach me how to get there and change my score? thanks!

----
the high scores for the game are saved in the registry

HKCurrentUser ->software ->microsoft ->Plus! ->Pinball->Space Cadet

if you just try to change the scores or names, the game will erase everything...there is another entry in this key "Verification" the game checks the scores and names and compares it to this number if it matches: good. else: erase...the varification number is calculated by adding all 5 of the scores, even the -999 for blank scores, and also adding the total sum of the ASCII values of all the letters of all the names...(remember capital and lowercase letters have different values)

now you can change the names and numbers, calculate the verification nubmer and it will keep it...

the highest possible score for the game is: 999,999,999

anything higher and it will erase everything
