SCRIPT NAME

examples/pequel_tables.pql

DESCRIPTION

This script demonstrates the use of pequel tables. This script contains a 'load table pequel' section. The tables specified in this section will have their data loaded by executing the pequel script specified. The field names for the table columns are as per the script output format. The output format for a script can be displayed with the '-list output_format' option on the command line. It is important that any Pequel script used in the 'load table pequel' to load a table must have an input_file option specification.

1. PROCESS DETAILS

Input records are read from standard input. The input record contains **8** fields. Fields are delimited by the '|' character.

Output records are written to standard output. The output record contains **5** fields. Fields are delimited by the '|' character.

1.1 PRODUCT_CODE

Output Field

Description

Set to input field **PRODUCT_CODE**

1.2 PRODUCT_SALES_TOTAL

Output Field

Description

Set to input field **SALESBYPROD**

Derived Input Field Evaluation

```
=> %TSALESBYPROD(PRODUCT_CODE) ->SALES_TOTAL
```

1.3 LOCATION

Output Field

Description

Set to input field **LOCATION**

1.4 LOCATION_SALES_TOTAL

Output Field

Description

Set to input field **SALESBYLOC**

Derived Input Field Evaluation

```
=> %TSALESBYLOC(LOCATION) ->SALES_TOTAL
```

1.5 COMMENT

Output Field

Description

Set to input field **COMMENT**

Derived Input Field Evaluation

```
=> %TSALESBYLOC(LOCATION)->TOP_PRODUCT eq PRODUCT_CODE  
?   '**Best Seller'  
:   ''
```

2. CONFIGURATION SETTINGS

2.1 *prefix*

directory pathname prefix.: examples

2.2 *pequeldoc*

generate pod / pdf pequel script Reference Guide.: pdf

2.3 *detail*

Include Pequel Generated Program chapter in Pequeldoc: 1

2.4 *script_name*

script filename: examples/pequel_tables.pql

2.5 *header*

write header record to output.: 1

2.6 *optimize*

optimize generated code.: 1

2.7 *doc_title*

document title.: Pequel Tables Example Script

2.8 *doc_email*

document email entry.: sample@youraddress.com

2.9 *doc_version*

document version for pequel script.: 2.3

3. TABLES

3.1 *TSALESBYLOC*

Table Type: **external**

Data Source Filename: **examples/sales_ttl_by_loc.pql**

Key Field Number: **1**

3.1.1 SALES_TOTAL = 2

3.1.2 TOP_PRODUCT = 3

3.2 *TSALESBYPROD*

Table Type: **external**

Data Source Filename: **examples/sales_ttl_by_prod.pql**

Key Field Number: **1**

3.2.1 SALES_TOTAL = 2

4. TABLE INFORMATION SUMMARY

4.1 Table List Sorted By Table Name

TSALESBYLOC — 1 (*external*)
TSALESBYPROD — 2 (*external*)
