SCRIPT NAME

examples/external_tables.pql

DESCRIPTION

Demonstrates the use of external tables. The default method for loading an external table is to embed the table contents in the generated code. SAMPLE1 is an example of an embedded table. External tables may also be loaded dynamically (at runtime) — the '_' table name prefix instructs Pequel to load the table dynamically. SAMPLE2 is an example of a dynamic table. The optional environment variable 'PEQUEL_TABLE_PATH' may be set to the path for the location of the table data-source-files. This path will be used to locate the data-source-files unless the data source filename is an absolute path name.

1. PROCESS DETAILS

Input records are read from standard input. The input record contains **8** fields. Fields are delimited by the '|' character.

Output records are written to standard output. The output record contains **8** fields. Fields are delimited by the '|' character.

Input stream is **sorted** by the input field **PRODUCT_CODE** (*string*).

Input records are **grouped** by the input field **PRODUCT_CODE** (*string*).

1.1 PRODUCT_CODE

Output Field

Description

Set to input field **PRODUCT_CODE**

1.2 RECORD_COUNT

Output Field

Description

Count aggregation.

1.3 SALES_QTY_SAMPLE1

Output Field

Description

Sum aggregation on input field **SALES_QTY**.

Aggregation condition

exists %SAMPLE1(PRODUCT_CODE);

1.4 SALES_QTY_SAMPLE2

Output Field

Description

Sum aggregation on input field **SALES_QTY**.

Aggregation condition

exists %SAMPLE2(PRODUCT_CODE);

1.5 S1_DESCRIPTION

Output Field

DescriptionSet to input field **S1_DESCRIPTION****Derived Input Field Evaluation**

```
=> %SAMPLE1 (PRODUCT_CODE) ->DESCRIPTION
```

1.6 S1_LOCATION

Output Field

DescriptionSet to input field **S1_LOCATION****Derived Input Field Evaluation**

```
=> %SAMPLE1 (PRODUCT_CODE) ->LOCATION
```

1.7 S2_DESCRIPTION

Output Field

DescriptionSet to input field **S2_DESCRIPTION****Derived Input Field Evaluation**

```
=> %SAMPLE2 (PRODUCT_CODE) ->DESCRIPTION
```

1.8 S2_LOCATION

Output Field

DescriptionSet to input field **S2_LOCATION****Derived Input Field Evaluation**

```
=> %SAMPLE2 (PRODUCT_CODE) ->LOCATION
```
