SCRIPT NAME

examples/pack_output.pql

DESCRIPTION

Demonstrates packing output data stream to packed or fixed record format. Use the 'pack_output' and 'output_pack_fmt' options together to specify packed/fixed record output data stream. The formats specified in 'output_pack_fmt' are the same as for the Perl pack/unpack functions. The format may be enclosed in square brackets to indicate that this is a repeat format — that is the format will be used for each field — so in this example the '[A3/Z*]' will expand to 'A3/Z*A3/Z*A3/Z*A3/Z*A3/Z*A3/Z*' to reflect the 7 field input record format. Please refer to the Perl perlpacktut manual for format definitions. The 'pack_output' option may not be used when the 'sort output' section is used.

1. PROCESS DETAILS

Input records are read from standard input. The input record contains **8** fields. Fields are delimited by the '|' character.

Output records are written to standard output. The output record contains **3** fields. Fields are delimited by the '|' character.

1.1 LOCATION

Output Field

Description

Set to input field **LOCATION**

1.2 PRODUCT_CODE

Output Field

Description

Set to input field **PRODUCT_CODE**

1.3 SALES_QTY

Output Field

Description

Set to input field **SALES_QTY**

2. CONFIGURATION SETTINGS

2.1 *prefix*

directory pathname prefix.: examples

2.2 *pequeldoc*

generate pod / pdf pequel script Reference Guide.: pdf

2.3 *detail*

Include Pequel Generated Program chapter in Pequeldoc: 1

2.4 *script_name*

script filename: examples/pack_output.pql

2.5 *header*

write header record to output.: 1

2.6 *optimize*

optimize generated code.: 1

2.7 *hash*

Generate in memory. Input data can be unsorted.: 1

2.8 *nulls*

print zero for null numeric/decimal.: 1

2.9 *doc_title*

document title.: Pack Output Example Script

2.10 *doc_email*

document email entry.: sample@youraddress.com

2.11 *doc_version*

document version for pequel script.: 2.3

2.12 *discard_header*

Input file has header record - must be discarded.: 1

2.13 *pack_output*

Pack output data stream: 1

2.14 *output_pack_fmt*

Pack format for output data stream: [A3/Z*]

3. TABLES

4. TABLE INFORMATION SUMMARY

4.1 Table List Sorted By Table Name

5. EXAMPLES/PACK_OUTPUT.PQL
